DRINKING WATER NOTICE

Monitoring or Reporting Requirements Not Met by Sumner Co RWD 5

Sumner Co RWD 5 public water supply system violated some drinking water standards. Even though this was not an emergency, as our customers, you have a right to know what happened and what we are doing to correct this situation.

We are required to monitor your drinking water for specific contaminants on a regular basis. Results of regular monitoring are an indicator of whether or not our drinking water meets health standards. During first quarter (January-March) 2014 and second quarter (April-June) 2016, we did not complete some required monitoring for Disinfection Byproducts as required by Kansas Administrative Regulations, and therefore cannot be sure of the quality of our drinking water during that time.

What happened: We missed a sample date.

What you should do and who is at risk: This is not an emergency. There is nothing you need to do at this time. There is no direct health risk to consumers.

What we are doing:(Describe corrective action) Staying on top of sample dates.

We anticipate resolving the problem within today.

For more information regarding this notice, please contact Gala Mies or Keith Leddy
620-456-2350

Please share this information with all the other people who drink this water, especially those who may not have received this notice directly (for example, people in apartments, nursing homes, schools, and businesses). You can do this by posting this notice in a public place or distributing copies by hand or mail.

This notice is being sent by Sumner Co RWD 5. PWS ID KS2019101. Date distributed 2-7-17
